Defined

All of the work of building a product lives on a spectrum.

You need open-ended **conceptual** work just as much as clearly-defined execution tasks.

We're now going to build on the vision statement by visualizing the various areas of concern with respect to the overall vision.

It's based on the Mission Model Canvas by Strategyzer <http://bit.ly/2bfhfKm>

Use your strategy to inform what you work on and when.

As you consider the path forward, consult research, explore possibilities, ask questions, develop hypotheses to test, and methods of measurement

Ask yourself:

P3

P4

Backlogs

Epics

User Stories

Roadmaps are not Master Project Plans.

They are designed to help us deliver the highest value to our users within the given time/budget constraints.

Vision

Roadmap

Backlogs

Epics

User Stories

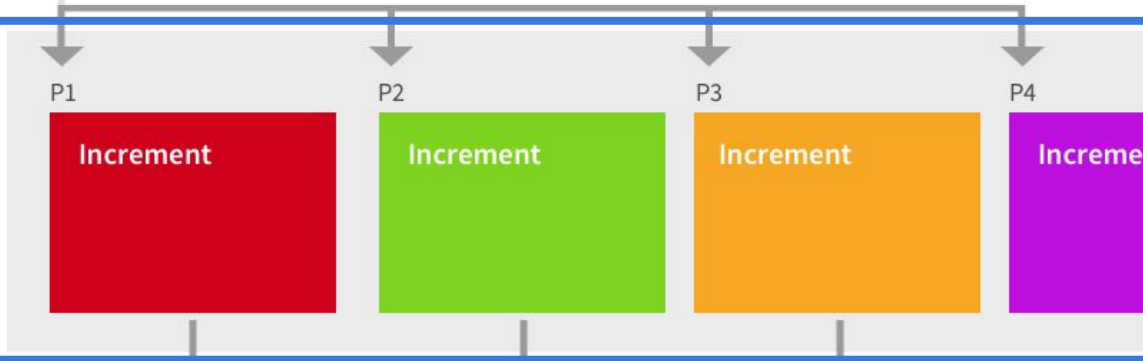

Roadmaps can and do change as you build and learn, and because the world changes.

Vision

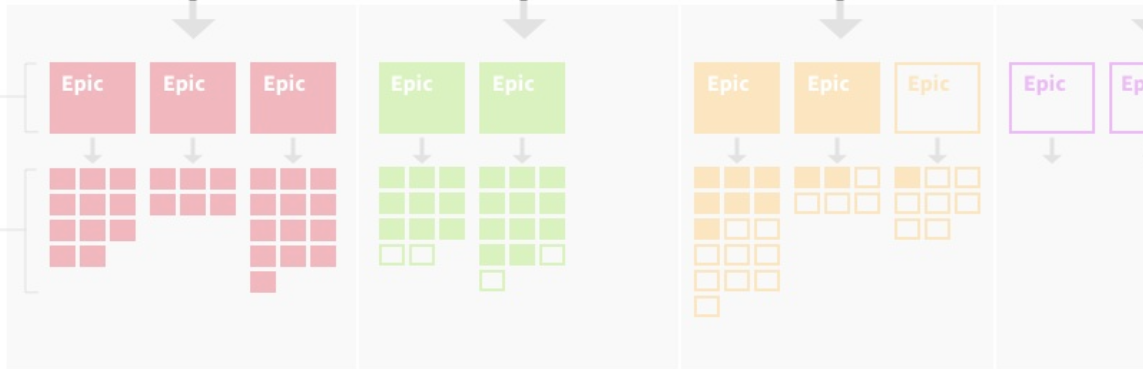

Roadmap

Backlogs

Epics

User Stories

Roadmaps can and do change as you build and learn, and because the world changes.

So, we cannot promise any particular feature by any particular date.

Pulling from your customer promises

Our constituent value propositions articulate the **scope of the team's work at a high level, in plain language.**

**They can be thought of as promises
we make to our beneficiaries,
partners and stakeholders**

**These promises serve as the
backbone of the product roadmap**

Vision

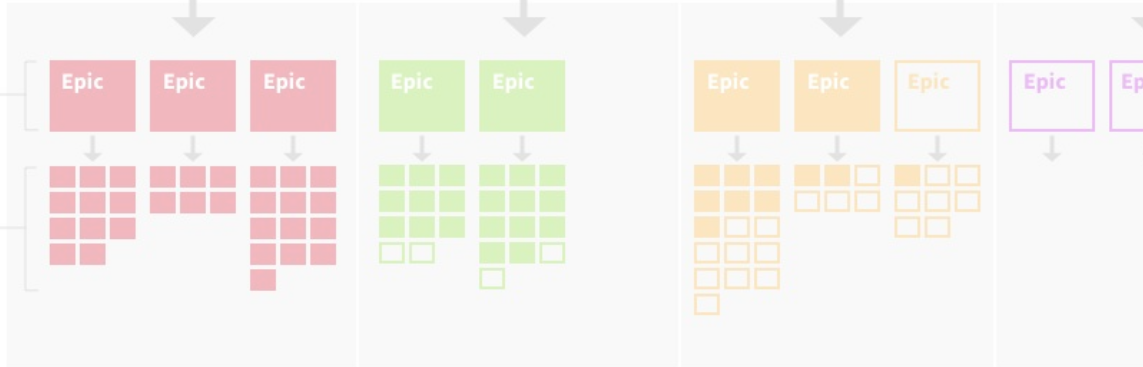

Roadmap

Backlogs

Epics

User Stories

They can be broken down into smaller promises that are addressed across increments, and grouped into milestones.

Vision

Roadmap

Backlogs

Epics

User Stories

As we iterate, we will work with the vendor(s) to break them down into smaller, more actionable chunks of work called “Epics”

Vision

Roadmap

Backlogs

Epics

User
Stories

Epics turn into the user stories and tasks that comprise the actual work in our product backlog.

Vision

Roadmap

Backlogs

Epics

User Stories

Epics turn into the user stories and tasks that comprise the actual work in our product backlog.

We organize this work into sprints that we groom and plan with the vendor.

As we begin, it will be difficult to tell how long it will take for features to be completed

**The longer we work together, and
with the vendor, the better we will be
able to estimate and communicate
feature timelines**

Our first step is to organize the work into milestones that make sense given our goals, and our constraints around time and budget
